PROFESSIONAL SUMMARIES

Frontend Engineer with 3+ years of experience building and shipping production web applications for AI, travel, and booking products. Specialized in React, Next.js (App Router), TypeScript, and TanStack Query, with hands-on experience designing BFF layers, Turborepo monorepos, and scalable design systems. Full MERN-stack capability, backed by a MERN Stack certification from Broadways Infosys. Open to remote roles and relocation.

EXPERIENCE

Software Engineer

May '26 — Present

AITC

Bhaktapur

- Built a Next.js-based BFF (Backend-for-Frontend) layer, using route handlers as a proxy to aggregate and shape downstream API responses for the client.
- Used Next.js 16 (App Router) and React 19 to build server-first, performant UI with the latest React features and streaming/Suspense patterns.
- Implemented middleware in the proxy layer for auth handling, request logging, and error normalization across aggregated API calls.
- Centralized sensitive tokens/API keys within the server-side BFF layer, keeping them out of the browser and reducing client-side attack surface.
- Collaborated with backend teams to define clean BFF-to-service contracts, keeping the proxy layer thin and maintainable.
- Built a Next.js-based BFF (Backend-for-Frontend) layer, using route handlers as a proxy to aggregate and shape downstream API responses for the client.
- Used Next.js 16 (App Router) and React 19 to build server-first, performant UI with streaming and Suspense patterns.
- Implemented middleware in the proxy layer for auth handling, request logging, and error normalization across aggregated API calls.
- Centralized sensitive tokens and API keys within the server-side BFF layer, keeping them out of the browser and reducing client-side attack surface.
- Collaborated with backend teams to define clean BFF-to-service contracts, keeping the proxy layer thin and maintainable.

Frontend Engineer

Jul '25 — Apr '26

IStem Labs

Kathmandu

- Build reusable components and maintain a scalable design system using **Tailwind CSS**, **TypeScript**, and **Styled Components**.
- Integrate RESTful APIs and manage client-server data synchronization using **TanStack Query (React Query)** for dynamic applications.
- Develop static and dynamic web applications using Next.js, leveraging SSR (Server-Side Rendering), SSG (Static Site Generation), and ISR (Incremental Static Regeneration) as per project requirements.
- Configured middleware for route protection, logging, and request handling in Next.js applications, and integrated headless CMSs (Sanity, Contentful) for dynamic content on statically generated sites.
- Contribute to a Turborepo-powered monorepo setup to streamline cross-project development, improve build performance through caching, and maintain scalable shared packages across frontend and backend services.
- Oversee Git-based version control and GitHub project workflows, enforcing structured branching strategies, conducting code reviews, and maintaining high standards for collaboration and code quality.

Frontend Engineer

Apr '25 — Jul '25

COL Thinkspace

Kathmandu

- Build responsive and user-friendly interfaces by collaborating with designers to ensure seamless front-end functionality and aesthetics.
- Handle end-to-end submission and publishing of apps on the Apple App Store and Google Play Store, ensuring compliance with guidelines
- Design, develop, and maintain high-performance websites, web applications, and mobile apps for Android & iOS using React.js and React Native.
- Write reusable, scalable code while ensuring optimal performance across different devices and platforms.
- Identify and resolve bugs, conduct performance tests, and implement updates to enhance application stability and speed.
- Work with backend developers, QA teams, and stakeholders to deliver feature-rich applications aligned with business goals.

Frontend Engineer - Remote - Part-time

Aug '24 — Oct '25

Mero Party

Kathmandu

- Developed and maintained a high-performance, mobile-responsive booking platform for Mero Party using React and TypeScript, ensuring a seamless user experience across both desktop and mobile devices.
- Implemented advanced server-state management with TanStack Query, optimizing data fetching and synchronization for improved application performance and reliability.
- Designed and styled the user interface with Tailwind CSS, resulting in a visually appealing and consistent design system that aligns with modern UI/UX best practices.
- Integrated react-helmet-async to manage dynamic meta tags and enhance SEO, contributing to better visibility and discoverability of the platform.
- Wrote clean, maintainable, and consistent code following industry best practices, which facilitated easier collaboration and future enhancements.
- Collaborated with cross-functional teams including designers and backend developers to deliver high-quality features and resolve issues promptly.
- Conducted code reviews and provided constructive feedback to peers, contributing to code quality improvements and knowledge sharing within the team.
- Utilized version control systems (e.g., Git) for efficient project management and collaboration, ensuring smooth deployment and integration workflows.

Frontend Engineer - Internship

Jun '24 — Sep '24

Treeleaf Technologies

Lalitpur, Nepal

- Worked on integrating API of chatbot web app with backend, which uses Machine Learning.
- Collaborated with the UI/UX team to transform design from Figma to React.
- Communicated with the QA team to learn about bugs and fix them.
- Built charts and table representations of data for an analytics web app using libraries such as Recharts.
- Utilized version control systems (VCS) like git for maintaining code.
- Ramped up quickly on the existing codebase and architecture, becoming a fully productive contributor ahead of expectations.

Frontend Intern

Sep '23 — Mar '24

KARYATHALO

Kathmandu, Nepal

- Partnered with the development team to design user-friendly web interfaces.
- Implemented responsive design principles, enhancing user experiences across devices and increasing mobile trac by 30%.
- Collaborated with a team of 5 to debug and refactor a legacy codebase, improving application performance by 30% and reducing load times by 20%.
- Conducted over 20-25 code reviews per month, ensuring adherence to coding standards and best practices, resulting in a 15% reduction in bugs and a 10% increase in team productivity through knowledge-sharing sessions.
- Utilized version control systems like Git for efficient collaboration and code management.
- Stay updated with the latest frontend technologies and best practices to ensure the application remains modern and efficient.

Graphics Designer

Aug '18 — Apr '22

Rees Nepal

Kathmandu

- Collaborated cross-functionality to develop creative and informative graphics.
- Used knowledge of graphics design software like canva, photoshop to produce graphics art and visual materials for promotions.
- Applied graphics design principles to communicate themes and messages in non-interactive communication materials.

PROJECTS

Bidmytrip – Travel Booking Platform (Monorepo Architecture), IStemlab [Link](#)

Present

Kathmandu, Nepal

- Contributed to the development of a large-scale travel booking platform built using a Turborepo-based monorepo architecture, enabling shared packages, optimized builds, and scalable cross-application development.
- Played a key role during the initial project setup, configuring the project structure, shared UI libraries, environment management, and development workflows to ensure a clean and maintainable foundation.
- Developed and maintained core dashboard features using React and TypeScript, focusing specifically on the user dashboard experience.
- Integrated RESTful APIs and handled client-server state synchronization using TanStack Query to ensure performant and reliable data fetching.
- Implemented role-based access control, protected routes, and authentication flows to ensure secure user access across dashboard modules.
- Optimized UI performance and component reusability through modular architecture and scalable state management patterns.

DJ Resub Portfolio (React) [Link](#)

- Created a personal portfolio website using React. Showcased projects, skills, and contact information in a clean and modern design.
- Optimized in-app navigation with React Router, resulting in a 30% reduction in user navigation errors.
- Built a music player for users to listen to mixes made by DJ Resub.
- Created a timeline to display the events and milestones of DJ Resub.

CERTIFICATIONS

MERN Stack Development Course , Broadways Infosys	Apr '24
Software Engineer Intern , Hackerrank	Aug '24
Frontend Developer (React) , Hackerrank	Jul '01

SKILLS

Frontend Development	HTML and CSS, JavaScript, TypeScript, ReactJS, NextJs, Bootstrap, Tailwind, React Redux, Tanstack, Styled Components
Backend Development	Node.js, Express.js
Version Control	Gitlab, Git, Github
Database	MongoDB, SQLite, PostgreSQL, Firebase, MySQL
Security	Bcrypt, Helmet.js, Passport.js, Clerk, OAuth
API Development	Restful APIs
Languages	Nepali, Hindi, English
