Ruchi Raj Karki

Frontend Engineer | React, Next.js, TypeScript

Phone: +977 9840715304 | Email: contact@ruchirajkarki.com.np | Location: Kathmandu, Nepal
LinkedIn: https://www.linkedin.com/in/ruchirajkarki | GitHub: https://github.com/ruchirajkarki
Portfolio: https://www.ruchirajkarki.com.np/ | Upwork: https://www.upwork.com/freelancers/~0183aa17b19dc61975
Work Authorization: Open to Remote Roles Worldwide; Open to Relocation

PROFESSIONAL SUMMARY

Frontend Engineer with 3+ years of experience building and shipping production web applications for AI, travel, and booking products. Specialized in React, Next.js (App Router), TypeScript, and TanStack Query (React Query), with hands-on experience designing Backend-for-Frontend (BFF) layers, Turborepo monorepos, and scalable design systems. Experience with server-side rendering (SSR), static site generation (SSG), and incremental static regeneration (ISR), RESTful API integration, role-based access control (RBAC), and headless CMS integration (Sanity, Contentful). Full MERN stack capability (MongoDB, Express.js, React, Node.js), backed by a MERN Stack certification from Broadways Infosys. Open to remote roles and relocation.

SKILLS

Frontend Development: React, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, React Native, Tailwind CSS, Redux, TanStack Query (React Query), Styled Components, Bootstrap, React Router, Recharts, react-helmet-async
Backend Development: Node.js, Express.js, RESTful APIs, Backend-for-Frontend (BFF), API Integration, Middleware (Authentication, Request Logging, Error Handling)
Architecture and Rendering: Turborepo Monorepos, Design Systems, Component Libraries, SSR, SSG, ISR, Streaming, Suspense, Protected Routes, Role-Based Access Control (RBAC)
Content and Data: Sanity, Contentful, Headless CMS
Databases: PostgreSQL, MongoDB, MySQL, SQLite, Firebase
Authentication and Security: Clerk, OAuth, Passport.js, Bcrypt, Helmet.js
Tools and Collaboration: Git, GitHub, GitLab, Figma, Code Review, Agile Collaboration
Languages: English (Professional Working Proficiency), Nepali (Native), Hindi (Fluent)

EXPERIENCE

Software Engineer | AITC | Bhaktapur, Nepal
May 2026 - Present

- Built a Next.js Backend-for-Frontend (BFF) layer using Next.js route handlers as a proxy to aggregate and shape downstream API responses for the client.
- Built server-first, performant user interfaces with Next.js 16 (App Router) and React 19 using streaming and Suspense patterns.
- Implemented middleware in the proxy layer for authentication handling, request logging, and error normalization across aggregated API calls.
- Centralized sensitive tokens and API keys in the server-side BFF layer, keeping credentials out of the browser and reducing client-side attack surface.
- Collaborated with backend teams to define clean BFF-to-service contracts, keeping the proxy layer thin and maintainable.

Frontend Engineer | IStem Labs | Kathmandu, Nepal
Jul 2025 - Apr 2026

- Built reusable React components and maintained a scalable design system using TypeScript, Tailwind CSS, and Styled Components.
- Integrated RESTful APIs and managed client-server data synchronization using TanStack Query (React Query) for dynamic, data-driven applications.
- Developed static and dynamic web applications using Next.js, applying SSR, SSG, and ISR according to project requirements.
- Configured Next.js middleware for route protection, logging, and request handling, and integrated headless CMS platforms (Sanity, Contentful) for dynamic content on statically generated sites.
- Contributed to a Turborepo monorepo setup to streamline cross-project development, improve build performance through caching, and maintain scalable shared packages across frontend and backend services.
- Managed Git-based version control and GitHub project workflows, enforcing structured branching strategies, conducting code reviews, and maintaining collaboration and code quality standards.

Frontend Engineer | COL Thinkspace | Kathmandu, Nepal
Apr 2025 - Jul 2025

- Designed, developed, and maintained high-performance websites, web applications, and mobile applications for Android and iOS using React and React Native.
- Handled end-to-end submission and publishing of applications on the Apple App Store and Google Play Store, ensuring compliance with store guidelines.
- Built responsive, user-friendly interfaces in collaboration with designers to ensure seamless front-end functionality and visual fidelity.
- Wrote reusable, scalable code and optimized performance across devices and platforms.
- Identified and resolved bugs, conducted performance testing, and implemented updates to improve application stability and speed.
- Worked with backend developers, QA teams, and stakeholders to deliver feature-rich applications aligned with business goals.

Frontend Engineer | Mero Party | Kathmandu, Nepal | Remote, Part-Time
Aug 2024 - Oct 2025

- Developed and maintained a high-performance, mobile-responsive booking platform using React and TypeScript across desktop and mobile devices.
- Implemented advanced server-state management with TanStack Query, optimizing data fetching and synchronization for application performance and reliability.
- Designed and styled the user interface with Tailwind CSS, building a visually consistent design system aligned with modern UI/UX best practices.
- Integrated react-helmet-async to manage dynamic meta tags and improve SEO, search visibility, and discoverability.
- Conducted code reviews and provided constructive feedback to peers, contributing to code quality improvements and knowledge sharing.
- Collaborated with designers and backend developers in a fully remote, cross-functional team to deliver features and resolve issues.

Frontend Engineer Intern | Treeleaf Technologies | Lalitpur, Nepal
Jun 2024 - Sep 2024

- Integrated the frontend of a chatbot web application with a backend powered by Machine Learning via REST APIs.
- Collaborated with the UI/UX team to transform Figma designs into production React components.
- Built charts and data table visualizations for an analytics web application using Recharts.
- Communicated with the QA team to identify, reproduce, and fix bugs.
- Ramped up quickly on the existing codebase and architecture, becoming a fully productive contributor ahead of expectations.

Frontend Intern | KARYATHALO | Kathmandu, Nepal
Sep 2023 - Mar 2024

- Partnered with the development team to design and ship user-friendly web interfaces.
- Implemented responsive design principles, increasing mobile traffic by 30%.
- Collaborated with a team of 5 to debug and refactor a legacy codebase, improving application performance by 30% and reducing load times by 20%.
- Conducted 20-25 code reviews per month, resulting in a 15% reduction in bugs and a 10% increase in team productivity through knowledge-sharing sessions.
- Used Git for version control, efficient collaboration, and code management.

Graphics Designer | Rees Nepal | Kathmandu, Nepal
Aug 2018 - Apr 2022

- Collaborated cross-functionally to develop creative and informative graphics for promotional materials.
- Produced graphic art and visual materials using Canva and Adobe Photoshop, applying graphic design principles to communicate themes and messages in non-interactive communication materials.

PROJECTS

Bidmytrip - Travel Booking Platform (Turborepo Monorepo) | IStem Labs

- Contributed to a large-scale travel booking platform built on a Turborepo monorepo architecture, enabling shared packages, optimized builds, and scalable cross-application development.
- Played a key role in initial project setup, including project structure, shared UI libraries, environment management, and development workflows.
- Developed and maintained core user dashboard features using React and TypeScript.
- Integrated RESTful APIs and handled client-server state synchronization using TanStack Query for performant and reliable data fetching.
- Implemented role-based access control (RBAC), protected routes, and authentication flows for secure user access across dashboard modules.
- Optimized UI performance and component reusability through modular architecture and scalable state management patterns.

DJ Resub Portfolio | React

- Created a personal portfolio website using React, showcasing projects, skills, and contact information in a clean, modern design.
- Optimized in-app navigation with React Router, resulting in a 30% reduction in user navigation errors.
- Built a music player for streaming DJ mixes and a timeline component displaying events and milestones.

EDUCATION

Bachelor of Science in Computer Science (In Progress) | University of the People | Online
31 of 120 credits completed. Actively enrolled.
